

ACCENTURE INNOVATION CHALLENGE 2026 • OFFICIAL BUSINESS PROPOSAL

BUSINESS PROPOSAL: ControlPlane.ai

Autonomous Real-Time AI Oversight, Guardrail & Quality Control Tower for Enterprise GenAI

Lead Author / Innovator: Tanu Shree • Accenture Lead

Executive Summary: Enterprise adoption of Generative AI is stalling due to trust, security, and cost unpredictability. In 2024, AI hallucinations caused **\$67.4B** in enterprise loss, while **97%** of AI security breaches lacked real-time inline guardrails. **ControlPlane.ai** introduces a model-agnostic, dual-speed control tower delivering **\$3.24M net annual cost avoidance** (32.4x ROI) for a 5,000-employee enterprise while ensuring strict compliance with the EU AI Act and NIST AI RMF.

1. Problem Framing & Market Opportunity

Conventional infrastructure monitors (Datadog, New Relic) only track CPU load and latency. When an LLM outputs a fabricated \$10M financial figure or leaks customer SSNs, the system reports HTTP 200 OK. ControlPlane.ai solves this blind spot by continuously inspecting content safety, factual accuracy, and compute efficiency in real time.

- **Total Addressable Market (TAM):** \$10.2 Billion by 2028 (34.2% CAGR).
- **Serviceable Addressable Market (SAM):** Fortune 2000 enterprises deploying GenAI (\$3.8B).
- **Regulatory Catalysts:** EU AI Act High-Risk Mandates (enforced 2025/2026) with penalties up to €35M or 7% global turnover.

2. Financial ROI & Economic Impact Model

Quantified business case for a typical 5,000-employee enterprise deploying GenAI (10,000,000 interactions/month):

FINANCIAL BENEFIT CATEGORY	WITHOUT CONTROLPLANE.AI	WITH CONTROLPLANE.AI
Hallucination Liability Avoided	1.8% error rate = \$2.40M in customer disputes & rework	+\$2,160,000 net savings (0.2% error rate)
Data Breach & Regulatory Penalties	High exposure to PII leakage (\$4.88M avg breach cost)	+\$850,000 (Risk-adjusted protection)
Judge Compute Token Burn	\$120,000/year (Flat 100% eval)	+\$90,000 (75% savings via Adaptive Sampling)
Engineering Maintenance	4 engineers building custom regexes (\$480k/yr)	+\$240,000 (Centralized policy studio)
TOTAL ANNUAL GROSS VALUE	—	\$3,340,000
Enterprise Platform Subscription	—	(\$100,000)
NET ANNUAL RETURN ON INVESTMENT	—	+\$3,240,000 (3,240% ROI / 32.4x)

3. Buyer Personas & Target Enterprise Stakeholders

- **Chief Information Security Officer (CISO):** Zero PII exfiltration, prompt-injection defense, and universal model-agnostic protection across all vendors.
- **Head of Generative AI / VP of Engineering:** Sub-15ms user latency SLA, 75% compute cost savings, and 1-line reverse-proxy gateway deployment.
- **Chief Risk & Compliance Officer (CRO / Legal):** Turnkey EU AI Act compliance, Human-in-the-Loop triage board, and 1-click downloadable SOC-2 audit logs.

4. Commercial Pricing Model

TIER	TARGET	INCLUDED CAPABILITIES & PRICING
Developer Sandbox	Individual Engineers	Free • Up to 50k requests/mo • Standard fast inline guards • Community support.
Enterprise Control Tower	Mid-to-Large Enterprises	\$8,000 / month • 5M requests/mo • Dual-Speed Engine + Parallel Judge • Dynamic Adaptive Sampling • Multi-user HITL Queue • 24/7 dedicated SLA.
Sovereign Air-Gapped	GovCloud / Defense / Banking	\$150,000+ / year • Unlimited on-premise deployments • Local vLLM/Ollama model weights • Custom HIPAA/FedRAMP compliance adapters.

5. Phased Scalability Roadmap (2026 – 2027)

PHASE	TIMELINE	KEY MILESTONES & DELIVERABLES
Phase 1: Core Gateway	Q3 – Q4 2026	Universal reverse proxy MVP • Groq LPU parallel judge integration • REST & WebSocket streaming telemetry.
Phase 2: Agentic Defense	Q1 – Q2 2027	Multi-hop autonomous agent guardrails • Tool/function call interception (preventing SQL injection & loops) • Automated RAG provenance engine.
Phase 3: Autonomous Scale	Q3 – Q4 2027	Self-healing guardrails (RLHF fine-tuning from HITL rejection logs) • Air-gapped on-premise appliance.

6. Strategic Accenture Alignment

ControlPlane.ai directly supports Accenture’s **\$3 Billion AI Investment** by providing a turnkey, plug-and-play governance shield for client GenAI engagements, accelerating enterprise sales cycles, and creating high-margin Managed Governance consulting services.
